

Pharmacists Optimizing Cancer Care®

HOPA/ASCO QTP 6-Month Program – 2026 Precision Oncology Thematic

Policies for Participation

Team Composition:

- All teams must meet the following criteria for participation:
 - Assemble a core team of 2-4 participants led by an oncology pharmacist/HOPA member in good standing. Multi-disciplinary teams are encouraged.
 - Assemble a larger team that will support the quality improvement project at the practice level.
 - Designate a team sponsor (typically a senior institutional leader) to support the work of the team.
- If any core team members change throughout the duration of the program, written notice of the change should be provided to both HOPA and ASCO within one week of the change.
- HOPA will only sponsor teams from institutions within the United States.

Attendance:

- Core team members must be able to attend the three in-person learning sessions of the Quality Training Program.
- If a core team member cannot attend a learning session due to unforeseen or extenuating circumstances, written notice should be provided to both HOPA and ASCO as soon as possible.
- No substitutes will be allowed to participate in the in-person learning sessions in place of the accepted core team members.

Financial Obligations:

- Participating teams will be required to pay a registration fee of \$1,899 to HOPA in order to enroll in the program. This fee may be paid by individual practice sites/institutions or the participants themselves.
- HOPA will cover flight and lodging costs for team members attending the in-person learning sessions. Meals (other than those provided during the in-person sessions), ground transportation, and other incidentals will not be eligible for reimbursement.
- Invoices will be sent when teams have been notified of their acceptance and confirmed their participation in the program. The program fee must be paid prior to the first learning session. Payments are non-refundable or transferable.

Reporting:

- HOPA has received funding from industry partners to help support this program. If accepted to this program, you will be required to submit a midpoint report on the progress of your project that will be shared with our partners. The report will be due during the summer of 2026. The contents of the midpoint report will be specified at a later date.

Publication:

- After the completion of your project, you will be required to publish your findings in order to share what you have learned more broadly. This may include publication in abstract, poster, or manuscript form. Acceptable publication venues include the HOPA Annual Conference, ASCO's Annual Meeting, the ASCO Quality Care Symposium, and/or in peer-reviewed oncology/pharmacy/healthcare quality journals.
- When you publish, you are required to credit HOPA in your publication, either as a funding source or listed in the acknowledgements section of your publication.
